Warps

`Warps` are a very nice way of teleporting to a specific place. By default the server has a few to get you around.

You see a list of warps by doing `/warp` in-game.

You can set your own warps so other players can visit for the low price of 16 Diamonds. You can simply do `/pw` in order to get started by browsing the menu.

Commands:

- `/pwarp <warp>` Teleports you to a Player warp.
- `/pwarp set <warp>` Sets a warp at your location.
- /`pwarp remove <warp>` Removes a warp you have set.
- `/pwarp desc set/remove <warp> <desc>` Warp Descriptions.
- `/pwarp amount` See how many warps you have set.
- `/pwarp icon <set/remove> <warp>` Set a warp icon with what you are holding.
- `/pwarp category <warp> <category>` Set a warp category.
- `/pwarp rename <warp>` Rename a warp you have set.
- `/pwarp setowner <warp> <player>` Transfer warp owenrship.
