Extra Info

- Spawn
- Exploits And Glitches

Spawn

Spawn is the "*Center*" of the server and is where multiple community builds, shops, and other collaborations reside. You can build any Shop in the Shoping District and any Minigame in the Minigames District. Just make sure you dont build them too close to others!

Exploits And Glitches

Venturekraft Vanilla is intended to feel as vanilla as possible. This means that while using some game breaking exploits and bugs are against the rules, several aren't. You can use any exploit or glitch as long as you don't have any direct advantage over it (for example Bedrock Breaking or Lit Entity Duping). Item duping is STRICTLY not allowed. If you are not sure if something is allowed or not then better ask in the Discord Server!
